RedFox
Industrial Routing Switch
RFI-18

The RedFox is a high performance industrial Ethernet switch with enhanced routing functionality, in a single robust box. A single RedFox allows you to build cost effective, secure and reliable networks that would previously have required several different units. The feature-rich firmware and highly specified hardware provide flexibility and enhanced performance when building complex networks.

Complex industrial networks

For mission critical applications our unique FRNT technology is the fastest protocol on the market for re-configuring large networks in the event of link or hardware failure. Gbit support on ring as well as drop ports along with bandwidth control techniques like VLANs and IGMP snooping allow RedFox to be optimised to perform with even the most bandwidth hungry applications such as video.

Advanced routing functions and firewall settings allow the RedFox to segregate networks and ensure that mission critical industrial networks are protected. The RedFox is also able to provide secure remote access to these networks across insecure connections by acting as a VPN endpoint.

Harsh industrial environment

Only industrial grade components are used which gives the RedFox an MTBF of 600 000 hours. The RedFox is designed without fragile or sensitive components to ensure the PCBs can withstand significant shock and vibration testing. As well as all this the hardware is designed and tested to dissipate heat so effectively that the operating temperature specification of –40 to +70°C is achieved with no internal fans.

The isolated power supply has an operating voltage range spanning from 16 VDC to 60 VDC and can be fed from two separate supplies of differing voltages making RedFox easy to power in the industrial environment as well as providing yet another level of resilience to the user.

Approvals

The construction of the units has gone through extensive testing and approvals both by Westermo and approved test houses. The RedFox has approvals for industrial as well as trackside applications.

Technical Data

Power and CPU	
Rated voltage	20 to 48 VDC
Operating voltage	16 to 60 VDC
Rated current	340 mA @ 24 VDC 150 mA @ 60 VDC
Rated frequency	DC
Polarity	Reverse polarity protected
Redundant power input	Yes
Isolation to	All other
Connection	Detachable screw terminal
Connector size	0.2 – 2.5 mm^2 (AWG 24 – 12)
Shielded cable	Not required

Console	
Electrical specification	TTL-level
Data rate	115.2 kbit/s
Data format	8 data bits, none parity, 1 stop bit, no flow control
Circuit type	SELV
Transmission range	15 m
Isolation to	All other except USB
Connection	2.5 mm jack, use Westermo cable 1211-2027

USB	
Electrical specification	USB 2.0 host interface
Data rate	Up to 12 Mbit/s (full-speed mode)
Circuit type	SELV
Maximum supply current	500 mA
Isolation to	All other except Console
Connection	USB receptacle connector type A

IO / Relay output	
Connect resistance	30 Ω
Isolation to	All other
Connection	Detachable screw terminal
Connector size	0.2 – 2.5 mm² (AWG 24 – 12)
Maximum voltage/current	60 VDC / 80 mA
IO / Digital input	
Voltage levels	Logic one >12V, Logic zero <1V
Isolation to	All other
Connection	Detachable screw terminal
Connector size	0.2 – 2.5 mm² (AWG 24 – 12)

Ethernet TX	
Electrical specification	IEEE std 802.3. 2005 Edition
Data rate	10 Mbit/s or 100 Mbit/s, manual or auto
Duplex	Full or half, manual or auto
Circuit type	TNV-1
Transmission range	Up to 150 m with cat5e cable or better
Isolation to	All other
Connection	RJ-45 auto MDI/MDI-X
Shielded cable	Not required, except when installed in Railway applications as signalling and tel-ecommunications apparatus and located close to rails*
Conductive housing	Yes
Number of ports	18
